

## Project 1: Multi Page Site PSD

### Criteria

1. **Structure:** Project code is clean, readable and DRY.
2. **Structure:** Project follows best practices.
3. **Requirements:** Project matches design provided as closely as possible.
4. **Requirements:** Student applies strategies and techniques learned in class, listed below.
5. **Communication:** Student participated in class discussion and was active in seeking help, demonstrations professionalism when interacting with peers, mentors and instructors.
6. **Communication:** Articulates problems they are facing thoughtfully, and can speak to their troubleshooting attempts.
7. **Project Management:** Student managed time wisely, and has a strategy to keep themselves organized.
8. **Project Management:** Student shows up on time and is present at each lesson.
9. **Presentation:** Speaks clearly and loud enough for everyone to follow and pay attention.
10. **Presentation:** Presents project information clearly and effectively.

### Must haves:

- Use a wrapper to constrain content on large displays
- Use external .css files
- box-sizing: border-box;
- CSS Normalize
- Floats and the proper use of .clearfix
- Semantic HTML elements (header, footer, section)
- Google web fonts

### Nice to haves:

- Relative positioning/absolute positioning
- Embedded media if it is part of the design (e.g. Youtube, Maps, Twitter, etc.)
- Background images
- Links within the page
- Icons made with icon fonts/css rather than PNG(if possible)
- CSS Gradients (if applicable)
- Use of RGBA() or HSLA()
- Creative use of Borders and border radius
- CSS3 animations (We didn't cover this yet, but do a search)
